

Combo Course

8 Ziplines

With 8 ziplines ranging from 250 to 1,800 ft long, you will soar through trees and over canyons **500 ft** below!

2 Suspension Bridges

Get your adrenaline pumping as you cross our 200 ft long bridges and see spectacular views of Colorado Springs.

180 ft Assisted Rappel

Finish with a thrill as you descend to the canyon floor and land next to a babbling brook.

 4 hours

\$235.00 per person

Participants will begin the Combo Course with a 15 minute drive up the historic Old Stage Road. Deep in the canyon, they will meet their guides! The guides will take the group through a short orientation and Ground School where they can practice their techniques before starting the tour.

The first two “warm up” lines are 250 and 310 feet long. These shorter lines allow participants to get the feel for the essential zipping techniques. After completing the second zipline, participants will take a short walk to the third zipline.

Standing on the granite formations, participants will prepare to soar 150 feet above the creek below. The fourth zipline will take them back over the same creek and above the quiet Midnight Falls.

After another short walk, participants will embark on their second longest zip of the day at 1,500 feet. Make sure to say hello to the hikers far below! In order to continue, participants will have a 15-20 min hike to sixth zipline.

During the hike, the guides can point out some prominent peaks in the background. The sixth zipline, at 400 feet long, offers beautiful and impressive views of the Seven Falls Canyon.

Next, participants will have to face the most nerve-wracking part of the tour. They will have to cross our 2-200 foot suspension bridges. Their guides can point out the impressive engineering that is essential to this course.

Heartbeats will begin to race as participants prepare to cross the seventh zipline and reach their highest point of 500 feet! As they catch their breath, the guides will hook them into the final, and longest, zipline of the tour. Participants will soar up the Seven Falls canyon and over the popular trail to the seven waterfalls.

If the 1,800 foot zipline wasn't enough, participants will be lowered to the canyon floor on our 180 foot assisted rappel. Seven Falls visitors will watch in amazement as you are lowered down the ridgeline. Remember to visit the seven waterfalls that gives this park its name.
